TEI (NZ) LIMITED

About Us

For over 25 years, we have been helping our customers meet their selective plating requirements. TEI (NZ) Limited has had extensive HANDS ON experience with the plating of both the Sifco and LDC brands. With this knowledge and expertise gained over the years gives us the point of difference from other trainers and agents being able to offer the technical support behind the process. The Sifco Brand being a global organisation and having over 50 years experience in the industry, TEI NZ Ltd is able to offer the full package:

- We offer Engineering expertise to develop a solution to your problem
- Our Technical Support Team and Sifco product backup guarantee can provide the skill and labour to carry out the most demanding applications
- We ensure solutions, supplies & equipment are readily available when and where you need them
- Our Sales and technical staff support you throughout the process

The Sifco Process is used in many industrial applications where ID, OD and flat surfaces need to be enhanced, repaired or refurbished

PRIMARY MARKETS

TEI (NZ) LIMITED

What is Selective Plating ?

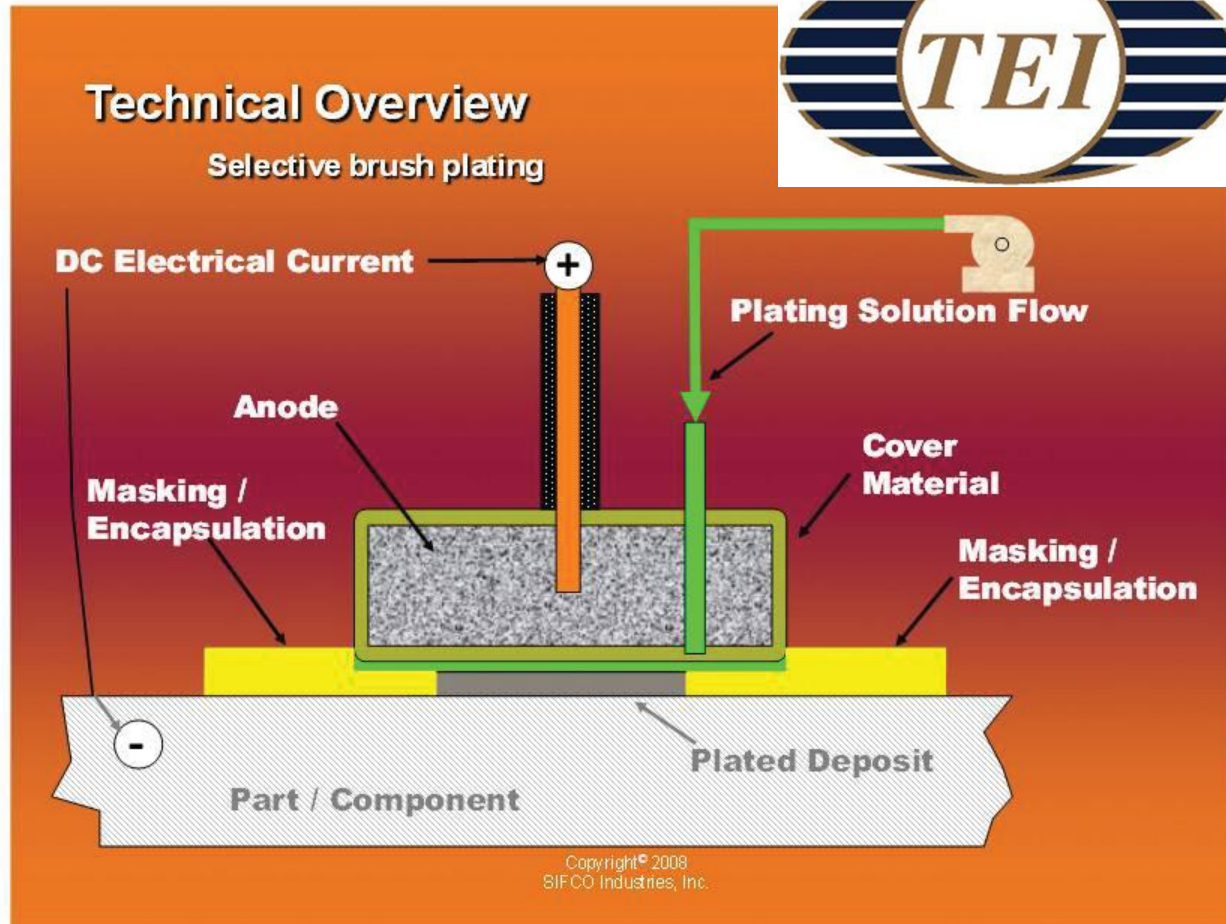

Selective Plating is a portable plating method used to enhance, repair and refurbish localized areas on manufactured components.

The Sifco process is the leading portable or insitu method of electroplating localized areas without the use of an immersion tank. It is primarily used for enhancing surfaces on OEM components, permanent repairs and salvaging worn or mis-machined parts without any heat distortion.

Sifco ASC Surface Treatments:

- Provide corrosion protection
- Improve wear resistance
 - Defect Repair
 - Print Cylinder Repair
 - Hydraulic Ram Repair
- ID or OD re-sizing repair
 - Prevent galling
- Serve as bearing surfaces
